About our Project

The Hidden Library is a github project developed in JavaScript. We used ExpressJS and MongoDB for Database. The idea behind our project is to create a site where the users could share pdf books for free. Our aim is to build a simple, but effective platform where the users have the potention not only to upload and download books, but to white summaries, to rate them. The project is relatively small, but it have a real target - to give a possibility for the publishers and active readers.

The Library includes many books in all gendres such as Horror, Comedy, Drama, Fantasy and more...

Registration is fast and easy to do – in less than a minute you can add new books, edit and delete them.

How to use The Hidden Library

1. In order to add a new book, first you have to press [Register](#) button and complete the registration.
2. You can delete and edit information about your books but you are not allowed to operate with other books!
3. Complete all the information about each book in correct form!
4. You can download books for free, without any registration.
5. The administrator can operate with all the books, which includes editing and deleting!
6. Please, do not add any books without a permission. The author rights are checked very strictly!
7. For more information you can check [About our Project](#).

The screenshot shows the 'HIDDEN LIBRARY' website header with navigation links: LIBRARY, REGISTER, LOGIN, ABOUT OUR PROJECT, and HELP. The main content area displays a 'Register' form. The form is titled 'Register' and contains the following fields and controls:

- Email:
- Full Name:
- Gender: ☐ Male ☐ Female
- Birth:
- Password:
- Confirm Password:
- Buttons:

At the bottom of the page, there is a copyright notice: © 2017 - Andromeda team - Software University Foundation.
